Richland, Ont.

BRENNER.—Sister Fanny Brenner died near Canton, Stark co., O., August 20, 1890 aged 68 years, 5 months and 28 days. Her maiden name was Lindenmuth. She was born in Lancaster co., Pa., Feb. 22, 1822. She was married to John H. Brenner in 1843. She was the mother of nine children, four sons and five daughters; three daughters, one son and her husband survive her. The family moved to Stark co., Ohio, in 1857. She was converted in the early part of her married life and united with the Brethren in 1865. She was a consistent member of the church; she lived a Christian life and was a faithful wife and a loving mother. On the 24th of August her remains, being followed by a large concourse of mourning friends and neighbors, were deposited into mother earth at the Rohland cemetery, Canton, Ohio. Funeral discourse in the Rohland church by Eld. Benj. F. Hoover of Richland co., O., and the writer. Text Psa. xlii, 1, 2.

Fancy Prices for Coins.

Some unusually high figures were obtained for rare coins at a sale held last Thursday in New York, under the auspices of Mason & Co., of Philadelphia. A silver dollar of 1791 brought \$45, and the same price was obtained for one of 1838. A dollar of 1839 fetched \$35; 1852, \$39. In half dollars the prices realized were 1790, \$38.50; 1797, \$34.50; 1815, \$14. Quarter dollar, 1796, \$12; a dime of 1804 brought \$24; a half dime of 1802, \$95; one of 1805, \$24; a proof set of 1858, \$12. Of the half cents sold one of the coinage of 1796 brought \$20.50, while others were sold at from \$2.25 to \$1.12 each. Among the Confederate States pieces a copper cent of 1861 went for \$8.50, a half-dollar for \$6, and a C. S. A. great seal for \$3.50. A silver medalet of Jefferson Davis was valued at just \$3.50. Ten thousand of American and foreign coins and medals, gold, silver and copper, ancient and modern, were disposed of at the sale.

To be Shortened Forty Miles.

The Altoona Tribune states that the work of straightening the track of the Pennsylvania Railroad Company will be continued until the distance between Philadelphia and Pittsburg will be shortened forty miles.

For SYPHILIS, or Venereal Disease, and for Mercurial Disease, which is sometimes complicated with it, the SARSAPARILLA must be taken for a long time and in large doses with each meal. After taking it for a month or six weeks, then substitute for a month, twenty drops of Tincture of the Muriate of Iron three times a day in half a glass of water. Thus alternate these two remedies until the disorder is expelled from the system.

BURKHOLDER'S BELL.—Fifty-nine persons of the Springville tobacco houses and vicinity sent their contributions to the "New Era" for the Bell Fund, along with it came the following piece of German Poetry, which is full of meaning and truths:

Die Bell, der Hund und's Seule.
Die bell, der hund, und's seule—
Die mach'ne gro se jacht,
Wann sie net bald uff'erre,
So werd noch viel gelacht.

Das seule werd net schmoken.
Es siehlt auch kein segar,
Der hund wird's auch net fressen—
Da ist gar kein gefahr.

Das seule braucht kein struemp.
Der hund auch keinen bute;
So werd mann bald zufriednen sein
Und fassen frischen muthe.

Seven tobaccoists from Springville have also forwarded contributions, who are friends of Burkholder and his new prison music, wish to help pay for the bell, "the sound of which the bosses don't like, but we do."

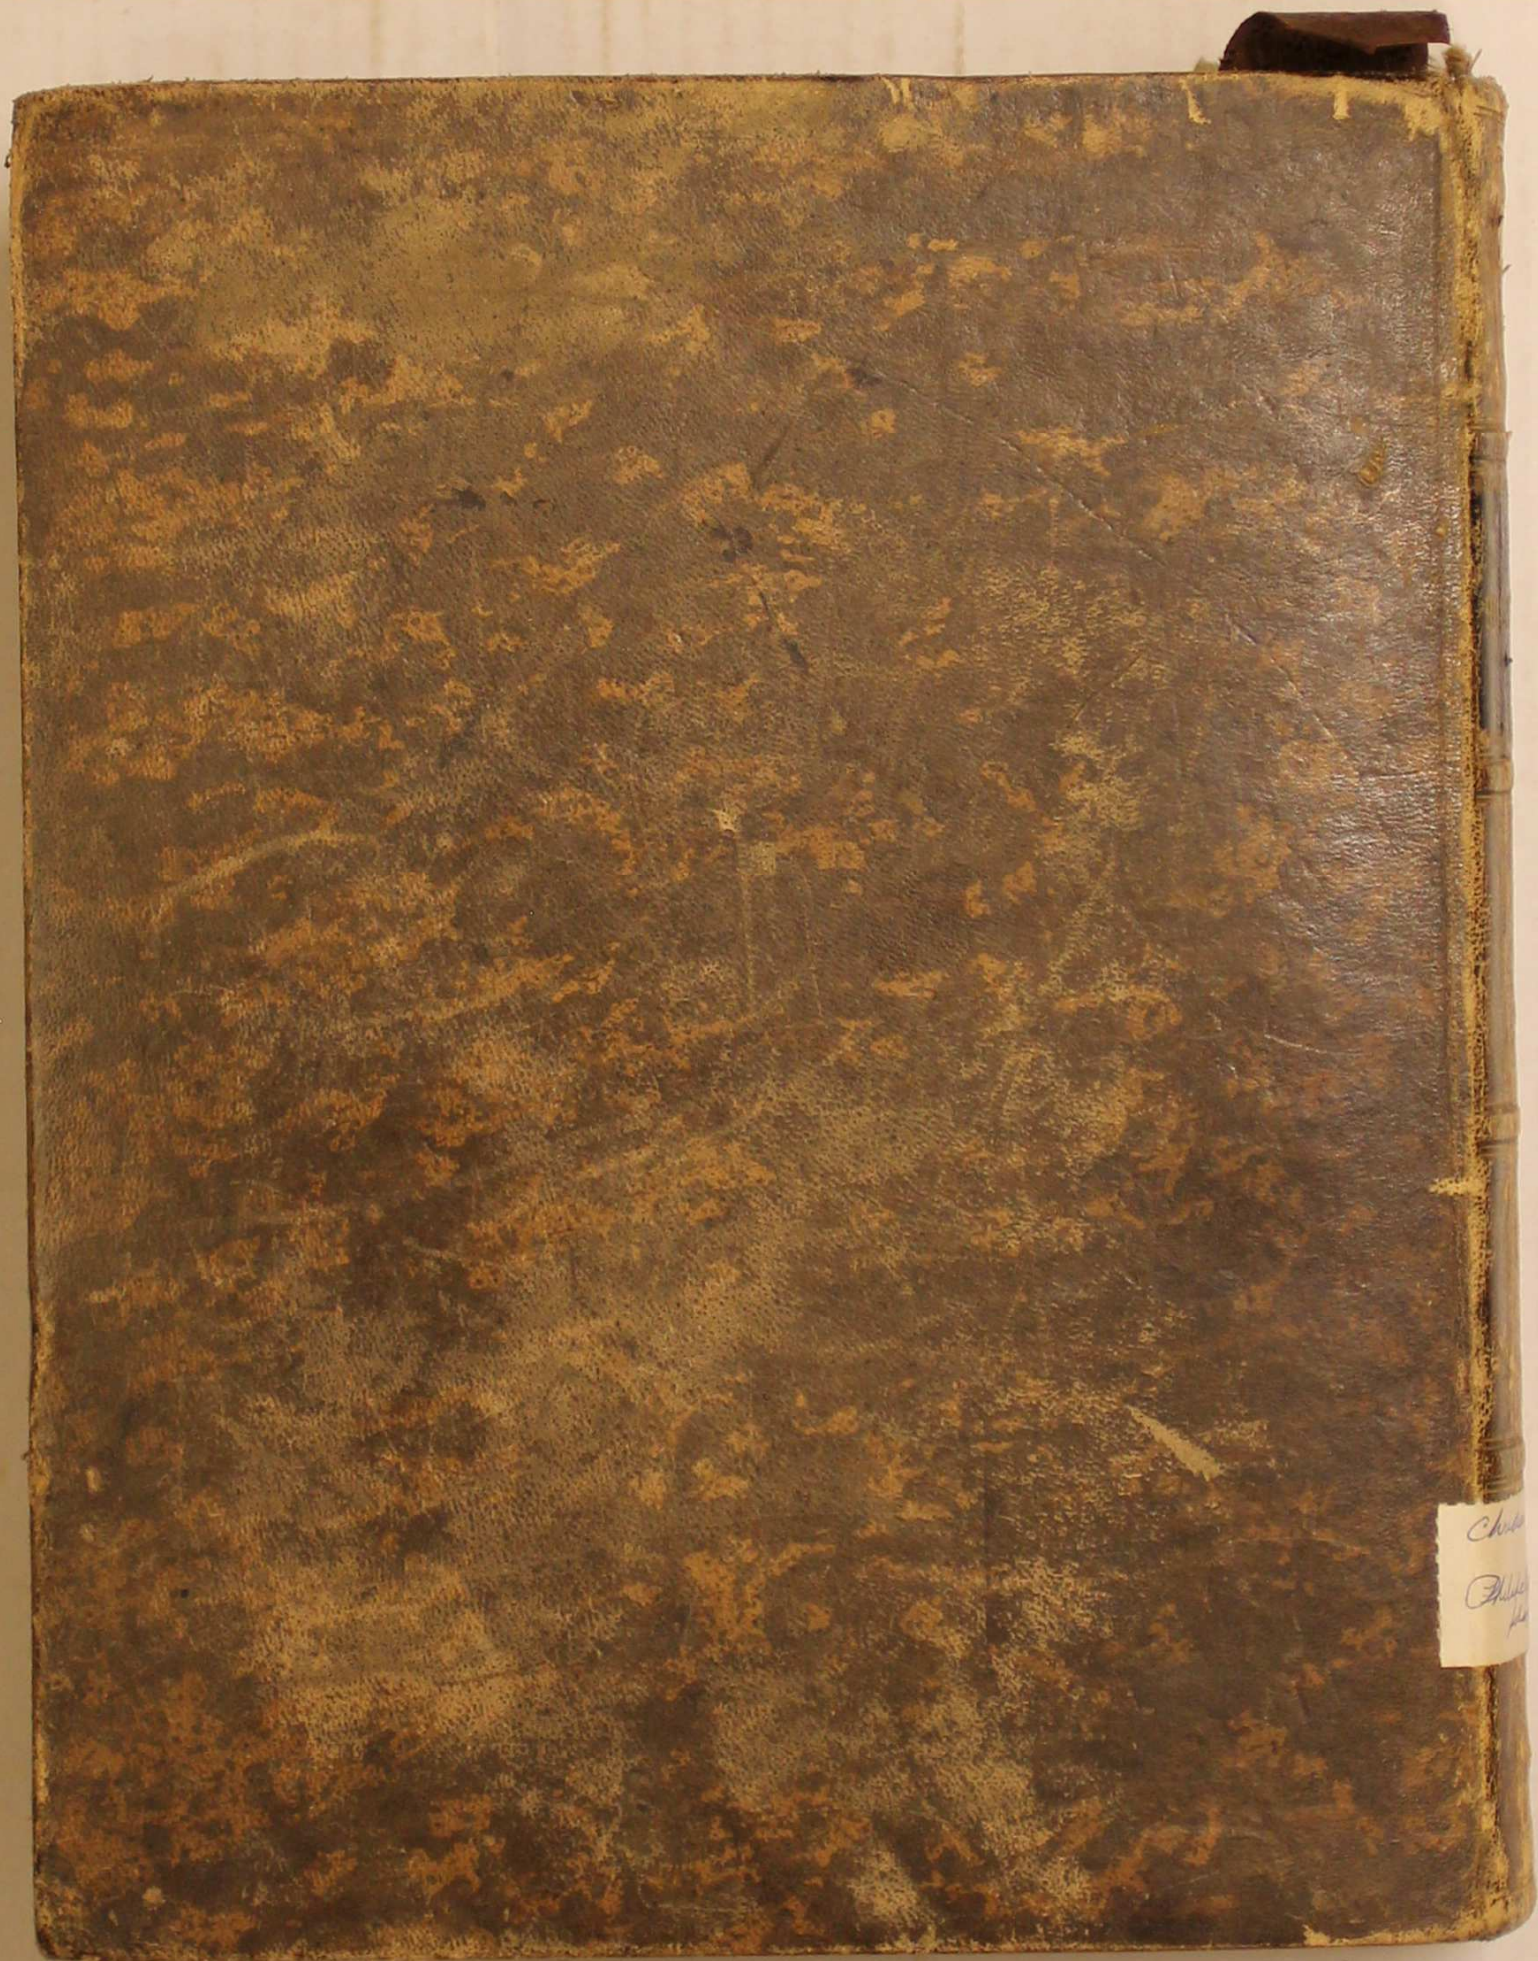

TO TELL A MISSING FIGURE.—Here is a little trick with figures, that is very puzzling until one knows how it is done, and after one knows it, that it should be so is not the less puzzling. Ask another to put down several figures to make a high number. Suppose 18273645. Tell him to add these figures, which, in this case, will give 36. Then subtract this sum from the figure 18-273645—36—18273609. All this while you have not seen the figures. Tell him to erase out one of these figures, add up what are left, and name the amount, and you will at once tell him what figure he erased. Suppose he erases the figure 7—the remainder added together make 29. The difference between this figure and the multiple of 9 that is next higher, will give the numeral crossed out. The next multiple of 9 to 29 is 36—and the difference between 29 and 36—the figure removed. —A.

UNCLE SAM'S COATING FOR OUTSIDE WALLS: The following coating for rough brick walls is used by the U. S. Government for painting light houses, and it effectually prevents moisture from striking through: Take of fresh Rosendale cement three parts, and of clean, fine sand one part; mix with fresh water thoroughly. This gives a gray or granite color, dark or light, according to the color of the cement. If brick color is desired, add enough Venetian red to the mixture to produce the color. If a very light color is desired, lime may be used with the cement and sand. Care must be taken to have all the ingredients well mixed together. In applying the wash, the wall must be wet with clean fresh water; then follow immediately with the cement wash. This prevents the bricks from absorbing the water from the wash too rapidly, and gives time for the cement to set. The wash must be well stirred during the application. The mixture is to be made as thick as can be applied conveniently with a whitewash brush. It is admirably suited for brickwork, fences, etc.; but it cannot be used to advantage over paint or white wash.
