

ABC Chart

Use this basic chart when observing behaviors in need of change

A—Antecedent : What happens right before the behaviors	B—Behavior: What is the behavior you want to change	C—Consequence: What happened right after the behavior occurred

Use this chart to collect information about a behavior that is considered challenging and would benefit from some extra support. Information gathered should help you figure out WHY this behavior might be happening and HOW we want to address this behavior by using prevention and replacement strategies.
