

## DECORATIVE CONCRETE PINE CONES

### INSTALLATION INSTRUCTIONS

These decorative concrete pine cones are designed to add additional realism to the look of your fireplace. When these pine cones are combined together with our ceramic fiber rocks, pebbles and embers create an even greater overall appearance of your fireplace.

Instructions:

- 1) Turn off log set and allow the area to cool before adding decorative pine cones.
- 2) Carefully place decorative pine cones on the floor of your fireplace evenly around your fireplace log set.
- 3) Keep decorative pine cones clear of any air openings in the log set or fireplace floor.

**⚠ WARNING:** Do not place the pine cones into or on the fireplace log set, burner or operating controls. The fireplace log sets have been tested to the appropriate agency regulations for safe operation and any additional media added to the burner will result in poor air quality conditions or sooting.

**⚠ WARNING:** The log set and surrounding media may become very hot when operating. Keep children and adults away from hot surfaces to avoid burns or clothing ignition.

Refer to your fireplace log set's original product manual for operation instructions. Contact a qualified installer, service agent, or local gas supplier if you have questions about operating your fireplace log set.
