

## Automotive Tyre Servicing Skills Assessment

The Automotive Skills Assessment is designed to document and evaluate the competency of candidates within the tyre industry for the purpose of obtaining a WA Motor Vehicle Repairer's Licence.

The Assessment comprises of written, third party and work-based components, it ensures that the candidate's knowledge and active use of skills is satisfactory for the assessor to endorse. The assessment covers the following optional streams:

- (I) Tyre Fitting – Light Vehicle (TFL)
- (II) Tyre Fitting – Heavy Vehicle (TFH)
- (III) Steering, Suspension & Wheel Alignment (SSW)

Candidates will engage in the completion of an evidence portfolio, in which they document their previous work history, previous qualifications/training, undertake a knowledge questionnaire and have their supervisor complete a checklist to ensure that the respective areas of competency are being practised in the workplace. Once this portfolio has been completed and submitted, the allocated assessor will review and schedule a practical assessment appointment. Should the candidate successfully complete all assessment criteria, the AIT will endorse the candidate for meeting the industry standard required for the relevant Repairer's Licence classification.
